

Mythic Tools with Real Salvage

Twelve keepers | Highest rarity each tier | Donor rarity counted | At least 99 percent completion

Higher rarity means more scrap

Icha finishes each keeper at the highest rarity for its tier, then upgrades. Dedicated donor batches receive natural tier-upgrade rolls and are scrapped at T2 through T6. Every donor rarity contributes its actual salvage yield.

Conservative whole-set shopping budget	Quantity
Donor tools across T2 through T6	16,151
T1 starting tools including 12 keepers	16,163
Reforging Solvents across T2 through T6	3,896
Hex Coins for Reforging Stabilizers	292,200
Finished tool ingredients across all tiers	883,400

Average consumption is much lower

About 7,014.49 donors and 1,808 solvents for all twelve keepers. The shopping budget includes protection against both low donor salvage and failed keeper rerolls; averages are not guarantees.

This supersedes the one-scrap-per-donor assumption for realistic planning. The old plan remains an extreme ceiling. This strategy is a conservative baseline, not a claim of minimum possible cost.

What Each Donor Really Gives

Verified against all 240 standard T2 to T6 tool salvage recipes in the published snapshot

♥ Scrap yield follows rarity

Donor rarity	Scrap returned
Common	1
Uncommon	3
Rare	15
Epic	50
Legendary	150
Mythic	500

♥ Natural donor upgrades change the average

Target tier	Mean scrap per donor
T2	1.60000
T3	2.56000
T4	3.80912
T5	5.29599
T6	6.98319

At T3, unselected donors are 49% Common, 46.5% Uncommon, and 4.5% Rare. Mean salvage = $0.49 \times 1 + 0.465 \times 3 + 0.045 \times 15 = \mathbf{2.56 \text{ scrap}}$. The same probability calculation continues through T6.

Donors receive ordinary tier upgrades only. They are not rerolled for salvage. Scrap stays tied to tier: T3 salvage funds T3 rerolls, not T6 rerolls.

Tiers 1 and 2 Shopping Lists

Fixed donor batches | Actual rarity salvage | Keeper free upgrade roll included

♥ Tier 1 Ferralith and Rough

Craft 16,163 tools at this tier. Keeper target: Common.

Done	Finished ingredient	Quantity
☐	Ferralith Ingot	64,652
☐	Rough Rope	32,326
☐	Rough Plank	32,326
☐	Rough Leather	32,326

Start 16,163 Ferralith tools: 16,151 allocated donors plus 12 keepers. Upgrade all to T2. Assign donor batches to target tiers before their rarity rolls.

♥ Tier 2 Pyrelite and Simple

Craft 16,163 tools at this tier. Keeper target: Uncommon.

Done	Finished ingredient	Quantity
☐	Pyrelite Ingot	64,652
☐	Simple Rope	32,326
☐	Simple Plank	32,326
☐	Simple Leather	32,326

Upgrade **16,163 T1 tools**. Scrap **148 allocated T2 donors**; budget **66 solvents**. Carry 16,015 tools to T3.

Each list includes 12 keepers: 48 ingots and 24 each of rope, planks, and leather. Previous-tier tools are carried forward. Donor batches are not selected by rarity.

Tiers 3 and 4 Shopping Lists

Fixed donor batches | Actual rarity salvage | Keeper free upgrade roll included

♥ Tier 3 Emarium and Sturdy

Craft 16,015 tools at this tier. Keeper target: Rare.

Done	Finished ingredient	Quantity
☐	Emarium Ingot	64,060
☐	Sturdy Rope	32,030
☐	Sturdy Plank	32,030
☐	Sturdy Leather	32,030

Upgrade 16,015 T2 tools. Scrap 367 allocated T3 donors; budget 152 solvents. Carry 15,648 tools to T4.

♥ Tier 4 Elenvar and Fine

Craft 15,648 tools at this tier. Keeper target: Epic.

Done	Finished ingredient	Quantity
☐	Elenvar Ingot	62,592
☐	Fine Rope	31,296
☐	Fine Plank	31,296
☐	Fine Leather	31,296

Upgrade 15,648 T3 tools. Scrap 1,439 allocated T4 donors; budget 322 solvents. Carry 14,209 tools to T5.

Each list includes 12 keepers: 48 ingots and 24 each of rope, planks, and leather. Previous-tier tools are carried forward. Donor batches are not selected by rarity.

Tiers 5 and 6 Shopping Lists

Fixed donor batches | Actual rarity salvage | Keeper free upgrade roll included

♥ Tier 5 Luminite and Exquisite

Craft 14,209 tools at this tier. Keeper target: Legendary.

Done	Finished ingredient	Quantity
☐	Luminite Ingot	56,836
☐	Exquisite Rope	28,418
☐	Exquisite Plank	28,418
☐	Exquisite Leather	28,418

Upgrade 14,209 T4 tools. Scrap 4,067 allocated T5 donors; budget 664 solvents. Carry 10,142 tools to T6.

♥ Tier 6 Rathium and Peerless

Craft 10,142 tools at this tier. Keeper target: Mythic.

Done	Finished ingredient	Quantity
☐	Rathium Ingot	40,568
☐	Peerless Rope	20,284
☐	Peerless Plank	20,284
☐	Peerless Leather	20,284

Upgrade 10,142 T5 tools. Scrap 10,130 allocated T6 donors; budget 2,692 solvents. Finish with the 12 Mythic keepers.

Each list includes 12 keepers: 48 ingots and 24 each of rope, planks, and leather. Previous-tier tools are carried forward. Donor batches are not selected by rarity.

Solvents and Rumbagh Supplies

Conservative stock for all twelve keepers | One stabilizer per solvent | 75 Hex Coins each

♥ Matching ingredients at every tier

Tier and solvent grade	Solvents	Fish oil	Seeds	Hex Coins
T2 Simple	66	132	660	4,950
T3 Infused	152	304	1,520	11,400
T4 Fine	322	644	3,220	24,150
T5 Exquisite	664	1,328	6,640	49,800
T6 Peerless	2,692	5,384	26,920	201,900
TOTAL	3,896	7,792	38,960	292,200

Fish oil and seeds use the grade shown in each row. Use an eligible Embergrain, Starbulb, or Wispweave recipe. The seed amount is a combined total across the selected recipes, not an amount required for every seed type.

♥ Make the catalysts then the solvents

1. Chemical Catalyst

2 matching Fish Oil + 10 eligible matching seeds = 1 Chemical Catalyst.

2. Reforging Solvent

1 matching Chemical Catalyst + 1 Reforging Stabilizer = 1 matching solvent.

Purchase total

3,896 stabilizers x 75 Hex Coins = 292,200 Hex Coins. The coins pay for the listed stabilizers. Average solvent consumption is 1,808; the conservative shopping budget is 3,896.

Average Costs and Bad Luck

Natural donor upgrades | Keeper free rolls | Both kinds of randomness accounted for

♥ Average and conservative donor counts

Tier	Average donors	Planned donors	Planned scrap
T2	52.85	148	198
T3	133.75	367	760
T4	584.01	1,439	4,830
T5	1,746.02	4,067	19,920
T6	4,497.86	10,130	67,300
TOTAL	7,014.49	16,151	93,008

The keeper sequence remains T2 Uncommon, T3 Rare, T4 Epic, T5 Legendary, and T6 Mythic. Each tier upgrade already gives one free rarity roll. When it succeeds, that keeper skips the step's rerolls.

♥ What the completion probability means

Each tier allows at most a 0.1% risk of exhausting its keeper reroll cap and at most a 0.1% risk that its donor batch yields too little scrap. Across the ten risks, the conservative whole-set completion probability is at least **99.061%**. This is a bound, not a guarantee or an optimal-budget claim.

Keeper caps use negative-binomial probabilities. Donor caps use lower-tail Chernoff bounds for the actual rarity-dependent scrap distribution. A 3,000-run simulation checked the model; the stated probability comes from the analytic bounds.

The model scraps every allocated donor and leaves any extra scrap unused. Rarity-based donor selection, choosing keepers from donor batches, or retaining valuable tools may improve the plan but require a different calculation. Refining inputs, food, buildings, and time are excluded.
