

BitCraft Mythic Tool Plan

Highest rarity at every tier | Twelve keeper tools | One scrap per donor | 99 percent budget

Bring each keeper to the highest rarity at its current tier before upgrading. Craft separate scrap donors only as far as T2, T3, T4, T5, or T6, wherever their scrap is needed.

What you are preparing	Quantity
Scrap donors across T2 to T6	89,860
Keeper tools progressing to T6 Mythic	12
T1 starting tools including all donors	89,872
Reforging solvents across T2 to T6	3,784
Hex Coins for Reforging Stabilizers	283,800

The assumption that makes this expensive

Every donor gives exactly one scrap. Higher-rarity donor yields and free rarity upgrades during crafting receive no credit in this plan.

The budget covers at least a 99% chance of finishing the entire twelve-tool set under the published probabilities. It is not a guaranteed maximum. Quantities are finished crafting ingredients, not raw gathering counts.

Rarity First Then Next Tier

T1 Common | T2 Uncommon | T3 Rare | T4 Epic | T5 Legendary | T6 Mythic

♥ Finish this rarity before upgrading

Tier and rarity step	Chance	Per roll	Roll cap	Donors
T2 Common to Uncommon	30%	3 + 1	75	225
T3 Uncommon to Rare	15%	5 + 1	156	780
T4 Rare to Epic	7.5%	15 + 1	319	4,785
T5 Epic to Legendary	3.75%	30 + 1	644	19,320
T6 Legendary to Mythic	1.875%	50 + 2	1,295	64,750

Per roll = scrap + solvents of that tier. Roll caps are pooled across all twelve keepers at that step. One donor supplies one scrap. Stop each keeper when it reaches the target rarity.

♥ Carry forward only the tools still needed

Make 89,872 T1 tools. At T2 scrap 225 donors; at T3 scrap 780; at T4 scrap 4,785; at T5 scrap 19,320; at T6 scrap 64,750. Upgrade only the remaining donors and your twelve keepers.

Keeper sequence Craft T2, reroll to Uncommon, then craft T3 and reroll to Rare. Repeat for Epic at T4, Legendary at T5, and Mythic at T6. Donors do not need rarity rerolls.

For one rarity step, the chance of success within n rolls is $1 - (1 - p)^n$. For this whole-set plan, each step is budgeted for twelve successes using a negative-binomial calculation. Each stage meets a probability of at least $0.99^{1/5}$; their joint completion probability is at least 99%.

Tiers 1 and 2 Shopping Lists

Pink shopping checklists | Scrapping donors at their target tier reduces later tier costs

♥ Tier 1 Ferralith and Rough

Craft 89,872 tools at this tier. Keeper target: Common.

Done	Finished ingredient	Quantity
☐	Ferralith Ingot	359,488
☐	Rough Rope	179,744
☐	Rough Plank	179,744
☐	Rough Leather	179,744

Start 89,872 Ferralith tools: 89,860 donors plus 12 keepers. Upgrade all to T2. Each tier costs 4 ingots and 2 each of rope, planks, and leather per tool.

♥ Tier 2 Pyrelite and Simple

Craft 89,872 tools at this tier. Keeper target: Uncommon.

Done	Finished ingredient	Quantity
☐	Pyrelite Ingot	359,488
☐	Simple Rope	179,744
☐	Simple Plank	179,744
☐	Simple Leather	179,744

Upgrade **89,872 T1 tools**. Scrap **225 donors at T2**. Budget **75 T2 solvents** for the keepers. Carry 89,647 remaining tools to T3.

Every list includes the 12 keepers: 48 ingots and 24 each of rope, planks, and leather per tier. Listed previous-tier tools are carried forward, not extra tools to buy.

Tiers 3 and 4 Shopping Lists

Pink shopping checklists | Scrapping donors at their target tier reduces later tier costs

♥ Tier 3 Emarium and Sturdy

Craft 89,647 tools at this tier. Keeper target: Rare.

Done	Finished ingredient	Quantity
☐	Emarium Ingot	358,588
☐	Sturdy Rope	179,294
☐	Sturdy Plank	179,294
☐	Sturdy Leather	179,294

Upgrade 89,647 T2 tools. Scrap 780 donors at T3. Budget 156 T3 solvents for the keepers. Carry 88,867 remaining tools to T4.

♥ Tier 4 Elenvar and Fine

Craft 88,867 tools at this tier. Keeper target: Epic.

Done	Finished ingredient	Quantity
☐	Elenvar Ingot	355,468
☐	Fine Rope	177,734
☐	Fine Plank	177,734
☐	Fine Leather	177,734

Upgrade 88,867 T3 tools. Scrap 4,785 donors at T4. Budget 319 T4 solvents for the keepers. Carry 84,082 remaining tools to T5.

Every list includes the 12 keepers: 48 ingots and 24 each of rope, planks, and leather per tier. Listed previous-tier tools are carried forward, not extra tools to buy.

Tiers 5 and 6 Shopping Lists

Pink shopping checklists | Scrapping donors at their target tier reduces later tier costs

♥ Tier 5 Luminite and Exquisite

Craft 84,082 tools at this tier. Keeper target: Legendary.

Done	Finished ingredient	Quantity
☐	Luminite Ingot	336,328
☐	Exquisite Rope	168,164
☐	Exquisite Plank	168,164
☐	Exquisite Leather	168,164

Upgrade 84,082 T4 tools. Scrap 19,320 donors at T5. Budget 644 T5 solvents for the keepers. Carry 64,762 remaining tools to T6.

♥ Tier 6 Rathium and Peerless

Craft 64,762 tools at this tier. Keeper target: Mythic.

Done	Finished ingredient	Quantity
☐	Rathium Ingot	259,048
☐	Peerless Rope	129,524
☐	Peerless Plank	129,524
☐	Peerless Leather	129,524

Upgrade 64,762 T5 tools. Scrap 64,750 donors at T6. Budget 2,590 T6 solvents for the keepers. Finish with 12 Mythic keepers.

Every list includes the 12 keepers: 48 ingots and 24 each of rope, planks, and leather per tier. Listed previous-tier tools are carried forward, not extra tools to buy.

Solvents and Rumbagh Supplies

T2 to T6 solvents | Matching fish oil and seed grades | One stabilizer per solvent

♥ The solvent ingredient shopping lists

Tier and solvent grade	Solvents	Fish oil	Seeds	Hex Coins
T2 Simple	75	150	750	5,625
T3 Infused	156	312	1,560	11,700
T4 Fine	319	638	3,190	23,925
T5 Exquisite	644	1,288	6,440	48,300
T6 Peerless	2,590	5,180	25,900	194,250
TOTAL	3,784	7,568	37,840	283,800

Fish oil and seeds use the grade shown in each row. Choose eligible Embergrain, Starbulb, or Wispweave seeds at that grade. Each listed seed quantity is a combined total, not a requirement for every seed type.

♥ Two little crafting steps at each tier

1. Make the matching catalysts

2 fish oil + 10 eligible seeds = 1 Chemical Catalyst, using the grade in that row.

2. Make the matching solvents

1 Chemical Catalyst + 1 Reforging Stabilizer = 1 Reforging Solvent of that grade.

Rumbagh purchase

Buy 3,784 Reforging Stabilizers in total at 75 Hex Coins each. Row solvent counts also equal row stabilizer counts. Total cost: 283,800 Hex Coins. The coins pay for these stabilizers; do not count them twice.

Everything Before You Roll

A final inventory check | Twelve keepers protected | Scrap donors at T2 through T6

♥ Finished ingredients across all six tiers

Resource group	Total across tiers
Ingots	2,028,408
Rope	1,014,204
Planks	1,014,204
Leather	1,014,204
All four ingredient groups	5,071,020

Each resource total combines six different tiers. Use the named shopping lists on pages 3 to 5 when gathering or purchasing; one tier cannot replace another.

♥ The twelve tools you keep

Axe, Saw, Chisel, Pickaxe, Hammer, Knife, Bow, Scissors, Hoe, Rod, Machete, and Quill. Make one keeper of each. Donors may use any of these standard tool recipes.

Order of work At each tier, protect the keepers, scrap the allocated donors, and reroll keepers to the tier rarity cap. Then upgrade the keepers and remaining donors. At T6 keep all twelve Mythic tools.

Budget scope All donors are credited with exactly one scrap. The roll caps conservatively ignore each keeper's chance of gaining rarity during its tier upgrade. Skip rerolls already satisfied by that upgrade. Refining inputs, consumables, food, workstations, travel, and gathering time are excluded.

♥ Recipe sources and date

Public game-data snapshot: September 21, 2026. Plan prepared October 4, 2026. Later live changes may alter recipes or probabilities.
